PROFESSIONAL SUMMARY

Motivated third-year B.Tech Computer Science student specializing in AI/ML, software development, and data science. Proven track record in building AI-powered retrieval systems and full-stack web applications using Python, Java, and modern frameworks. Seeking an engineering internship to apply technical skills and build scalable, real-world solutions.

EDUCATION

Academy of Technology — West Bengal, India
Bachelor of Technology (B.Tech) in Computer Science and Engineering — Expected Graduation: May 2028
Current CGPA: 7.8 / 10

TECHNICAL SKILLS

Languages:	Python, Java, C, JavaScript, SQL, HTML/CSS
AI / ML & Frameworks:	Machine Learning, Natural Language Processing (NLP), RAG, Sentence Transformers, FAISS, Ollama, Scikit-Learn
Web Dev & Databases:	React.js, Spring Boot, FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB
Tools & Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Git, GitHub

KEY PROJECTS

Intelligent Enterprise Knowledge Assistant (RAG-Based Q&A) — Independent Project
Technologies: React, FastAPI, Sentence Transformers, FAISS, Ollama, Python

- Designed and built a full-stack AI application using Retrieval-Augmented Generation (RAG) to query document collections (PDF, DOCX, TXT, Markdown).
- Implemented semantic vector search using Sentence Transformers and FAISS for fast and accurate context retrieval.
- Integrated local LLM inference via Ollama to generate precise, context-aware answers complete with source citations.

Hotel Booking Management System — Independent Project
Technologies: Java, Spring Boot, PostgreSQL, REST APIs

- Developed a full-featured backend application using Spring Boot to manage hotel listings, room inventory, and reservations.
- Designed and implemented RESTful APIs using a layered architecture to seamlessly process booking transactions.
- Configured persistent relational database storage with PostgreSQL for reliable management of customer and room records.

CERTIFICATIONS & TRAINING

Complete Machine Learning, NLP, MLOps & Deployment Bootcamp — Udemy | Self-Paced

- Studied machine learning algorithms, statistical concepts, and model evaluation using Python and Scikit-learn.
- Learned deep learning, natural language processing (NLP), and practical AI applications through hands-on projects.
- Explored ML model deployment and MLOps practices for building and managing end-to-end machine learning pipelines.
